### **Number of deaths remains below the five-year average**

**Vienna**, 2021-03-04 – According to preliminary results by Statistics Austria, 1 726 people died in Austria in calendar week 7 (from 15 to 21 February 2021). The number of deaths has been decreasing for four weeks and is now 1.9% below the five-year average (2016–2020) for the same calendar week. In the previous calendar week 6, the number of deaths has already been lower than the five-year-average (-2.2%).

Further information on [deaths](#) can be found on our website, where an interactive web application – [the Atlas of Deaths](#) – also graphically illustrates the development and regional distribution. Detailed results can be found in Statistics Austria's [open data repository](#).
