Q: STATISTIK AUSTRIA. Erstellt am 07.12.2021. - 1) Arbeitstägige Bereinigung nach X-13 ARIMA-SEATS (US Bureau of the Census); siehe auch: Statistische Nachrichten 08/2017 (Der Außenhandel Österreichs im Jahr 2016). - 2) BM = Berichtsmonat (Jänner bis Dezember). - 3) AT pro BM = Anzahl der Arbeitstage pro Berichtsmonat. - 4) AT langj. Ø = langjähriger Durchschnitt der Arbeitstage. - 5) Werte in Euro. - 6) EU = Europäische Union, Summe der EU-Mitgliedstaaten. - 7) Drittstaaten = Insgesamt minus EU (diese Gruppe umfasst alle Staaten, die keine EU-Mitgliedstaaten sind). Nachfolgender Hinweis gilt für EU/Drittstaaten gleichermaßen: Die Zusammensetzung der jeweiligen Ländergruppen entspricht immer dem jeweils aktuellen Stand des letztpublizierten Berichtszeitraumes. Dies bedeutet, dass auch bei vorangegangenen Berichtsjahren die aktuell gültige Ländergruppeneinschließung ausgewiesen wird. Es können daher bei der Abfrage historischer Daten einerseits Differenzen zu Veröffentlichungen von Ländergruppenergebnissen in der Vergangenheit auftreten und andererseits kann es Einschränkungen bei der Additivität dieser Ergebnisse aus früheren Berichtsjahren geben. - *) vorläufige Ergebnisse; Aktualisierung mit jeder monatlichen Publikation des aktuellen Berichtsjahres..
